FREE TASTER SESSION · 29 AUG 2026

The Future of Work & Your Career Edge

What We'll Cover Today

🕒 Sat 29 Aug · 11:00 – 13:00

01

Future of Work

How AI is transforming every industry and role — and why the skills gap is widening faster than most organisations realise.

02

AI Impact on Roles — Illustration & Demo

Walkthrough of agentic AI use cases: Finance Analyst, Aerospace Engineer and Recruiter — before vs. after, and the SDLC transformation.

03

The Dystil Advantage

How Dystil bridges the gap between academia and employability — our Corporate and Students advantage, bootcamp pathways and what sets us apart.

04

Q&A

Open floor for your questions — career pathways, programme details, next cohort dates and anything else on your mind.

Your Host Today

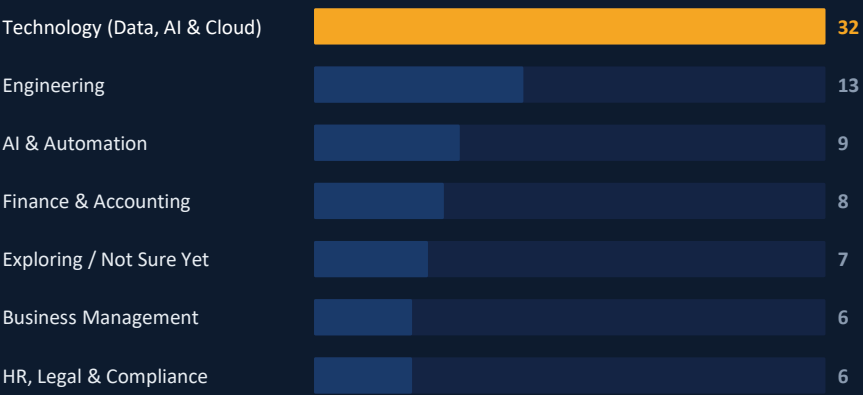

Khadir Fayaz — Senior Vice President, Digital & Technology, CBRE

- C-suite digital and technology executive with more than 20 years cross industry experience, working for world's largest organizations
- Active industry contributor and thought leader, speaking regularly on AI strategy, Digital transformation
- Board advisor and Non-Executive Director to multiple technology startups, guiding early-stage companies on technology strategy and scale
- A long-standing voice in learning and development: led the technology transformation behind the world's first Global Learning Digital Platform at Pearson, and serves as Lead Mentor to EduTech startup cohorts, shaping how the next generation of learning companies build and grow
- LinkedIn - <https://www.linkedin.com/in/khadirf/>

LinkedIn Workforce Report

#1

skill employers look
for in new hires in 2026

Microsoft Work Trend Index

Engineering · Finance · Medicine · Law · Marketing · Tech — AI is reshaping all of them.

The Forms of AI Reshaping Work — Now and Next

Predictive AI · 1990s–now

Generative AI · 2022–now

Agentic AI · 2024–now

Multimodal AI · 2024–now

Physical AI · Emerging

PREDICTIVE AI

ESTABLISHED

**Learns from the past
to forecast the future**

Trained on historical data to identify patterns and predict outcomes. Powers credit scoring, fraud detection, demand forecasting and medical diagnostics.

Examples:

Credit scoring · Demand forecasting · Churn prediction · Fraud detection · Clinical risk scoring

Work impact:

Analysts, Risk Managers and Operations teams use it to make data-driven decisions faster and with greater accuracy.

GENERATIVE AI

MAINSTREAM

**Creates new content
from learned patterns**

Generates text, images, code, audio and video from prompts. Built on large language and diffusion models. Powers tools like ChatGPT, Copilot and Midjourney.

Examples:

ChatGPT · GitHub Copilot · Midjourney · Claude · Gemini · Sora

Work impact:

Marketers, Developers, Designers and Writers now produce first drafts in minutes — shifting effort from creation to curation and refinement.

AGENTIC AI

TRANSFORMATIVE NOW

**Plans, decides and acts
autonomously across tasks**

AI agents that can reason, plan multi-step actions, use tools, browse the web and complete complex workflows with minimal human intervention.

Examples:

AutoGPT · Devin · n8n agents · OpenAI Operator · Claude Agents · Salesforce Agentforce

Work impact:

Finance, Procurement, HR and Engineering teams are replacing entire manual workflows — not just speeding them up.

MULTIMODAL AI

RAPIDLY MATURING

Processes and generates across text, images, video, audio and code simultaneously. Models like GPT-4o and Gemini Ultra understand a photo, a voice note and a spreadsheet in the same prompt — enabling richer, context-aware outputs across every professional workflow.

PHYSICAL / EMBODIED AI

EMERGING

AI that perceives and acts in the physical world — powering humanoid robots (Figure, Tesla Optimus), autonomous vehicles and smart manufacturing. Already entering warehousing, logistics and aerospace. The next frontier for engineering, healthcare and industrial roles.

How AI is Transforming Every Phase of Software Delivery

From planning to production — AI agents are reshaping how Product Managers, Developers and Testers work at every stage.

Agentic AI is not just a tool. It is a new colleague.

See how three professional roles are being transformed — and what new skills they need to stay ahead.

Procurement Manager

Sourcing, supplier management & cost optimisation

Aerospace Engineer

Design, simulation, safety compliance & maintenance

Recruiter

Talent acquisition, screening & candidate experience

For each role: we compare the manual workflow vs. the agentic AI workflow, the time and quality impact, and the new skills professionals need to remain relevant and valuable.

Procurement Manager

Sourcing · Supplier Management · Contract Review · Cost Optimisation

WITHOUT AI ✗

 **Supplier Sourcing & Qualification**

WITH AGENTIC AI ✓

AI agent searches global supplier databases, scores against risk & compliance criteria, drafts RFQ documents and shortlists top candidates — within hours.

NEW SKILLS NEEDED

Supplier strategy
AI output review
Risk interpretation

 **Contract Review & Risk Flagging**

Agent reads 100-page contracts in seconds, flags non-standard clauses, missing SLAs, liability gaps and compliance risks — with page-level citations.

Legal AI literacy
Negotiation strategy
Compliance judgment

 **Spend Analysis & Cost Reduction**

Real-time agentic spend monitoring. Automatically identifies duplicate suppliers, consolidation opportunities, off-contract spend and renegotiation triggers.

Data-driven decisions
AI insight interpretation
Savings case building

 **Supplier Performance Monitoring**

Continuous agentic tracking of delivery, quality and SLA metrics. Early warning alerts. Auto-generates supplier scorecards and escalation recommendations.

Relationship strategy
Agentic workflow design
Performance framing

✈️ Aerospace Engineer

Design & Simulation · Systems Analysis · Safety Compliance · Maintenance

WITHOUT AI ✕		WITH AGENTIC AI ✓	NEW SKILLS NEEDED
✂️ Design & Structural Simulation	➔	AI agent runs thousands of FEA/CFD simulations autonomously overnight, flags structural failure modes, suggests optimal material choices and geometry refinements — before a human opens the model.	AI simulation oversight Generative design Model validation
📄 Safety & Compliance Documentation	➔	Agent auto-maps design changes to regulatory requirements (FAA/EASA), flags compliance gaps, generates audit-ready documentation and revision histories in real time.	AI regulatory literacy Compliance judgment Risk interpretation
🔧 Predictive Maintenance & Fault Detection	➔	Agentic AI continuously monitors sensor data from aircraft systems, predicts component failures weeks in advance, auto-schedules maintenance and orders parts before failure occurs.	IoT & sensor data literacy AI alert triage Maintenance strategy
🚀 Mission & Systems Trade Studies	➔	Agent evaluates hundreds of system architecture trade-offs simultaneously — weight, cost, performance, risk — and produces ranked design options with full reasoning trails for engineers to review.	AI trade study framing Systems thinking Decision governance

Recruiter

Talent Acquisition · CV Screening · Candidate Experience · Interview Scheduling

WITHOUT AI ✗

WITH AGENTIC AI ✓

NEW SKILLS NEEDED

 CV Screening & Shortlisting

AI agent screens all applicants against structured criteria in minutes, ranks by fit, surfaces hidden gems and flags potential bias — with explainable reasoning.

Bias auditing
Criteria design
AI governance

 Candidate Outreach & Nurturing

Agentic AI handles personalised outreach at scale, answers FAQs 24/7, nudges candidates at optimal times, and flags disengagement signals to the recruiter.

Prompt & tone design
Candidate experience
AI personalisation

 Interview Scheduling & Coordination

Agent autonomously finds mutual availability, books rooms/video links, sends confirmations and reminders — zero recruiter involvement in logistics.

System integration
Agentic tool config
Process design

 Talent Pipeline & Predictive Matching

AI agent builds and maintains live talent pipelines, predicts hiring needs from business signals, proactively surfaces warm candidates before roles are even opened.

Workforce planning
Data storytelling
Strategic talent advisory

Time-to-shortlist reduced by 75% · Recruiter capacity freed for relationship-building, advisory and strategic talent planning

AI doesn't replace the role. It raises the bar for the person in it.

📋 Procurement Manager	✈️ Aerospace Engineer	👤 Recruiter
BEFORE ✗	BEFORE ✗	BEFORE ✗
· Manual supplier outreach · Spreadsheet scoring · Quarterly reviews · Reactive spend analysis	· Manual simulation setup · Sequential design reviews · Reactive fault detection · Paper-based compliance docs	· Manual CV review · Template outreach emails · Calendar coordination · Reactive hiring only
↓	↓	↓
NEW SKILLS ✓	NEW SKILLS ✓	NEW SKILLS ✓
✓ AI contract & risk analysis ✓ Agentic workflow configuration ✓ Data-driven negotiation strategy ✓ Spend AI oversight & governance	✓ AI simulation oversight & validation ✓ Generative design interpretation ✓ Predictive maintenance strategy ✓ AI regulatory & compliance literacy	✓ AI criteria & bias audit design ✓ Agentic candidate experience design ✓ Predictive talent pipeline management ✓ Strategic talent advisory
From process manager → Value strategist	From model runner → Design decision-maker	From transactional hirer → Talent strategist

Dystil's Career Accelerator teaches exactly these skills — AI fluency, agentic workflows and real project experience across all major industries. dystil.ai

The Hiring Landscape Has Changed

What used to be enough

- X A good degree
- X High GPA / grades
- X Work experience in any role
- X Generic CV

What employers now need

- ✓ AI fluency & digital skills
- ✓ Demonstrable project experience & portfolio
- ✓ Industry knowledge & leadership
- ✓ Adaptability & real-world thinking

Bridging Academia and Employability

⚡ THE DYSTIL DIFFERENCE — Short. High Impact. Career Ready.

	Other Learning Providers ✗		Dystil Career Accelerator ✓
Duration	6 – 12 months of study before you see any career benefit	→	2 days (Foundation) or 2 weeks (Advanced) — results immediately
Investment	Thousands in fees with no guaranteed outcome or job placement	→	Low cost, high-ROI — structured to fit around your life
Focus	Broad theory-heavy syllabuses disconnected from real employer needs	→	Employer-aligned skills, live projects & portfolio you can show on day one
Outcome	A certificate with no real-world experience to back it up	→	Certificate + project portfolio + mentor network + career guidance

Practical AI Learning

Live Project Experience

Mentor Support

CV & Job Guidance

Certificate

Closing the AI Skills Gap — For Businesses and Career Seekers.

AI is reshaping every industry, every role, every team. The gap between those who adapt and those who don't is widening — fast. Dystil exists to close it.

DYSTIL CORPORATE

AI Upskilling for Business Teams

Role-based, practical AI training that turns everyday business workflows into real AI use cases — built for teams that need results, not theory.

⚡ Role-based learning mapped to real job functions

✂ Hands-on AI tools — no coding required

📊 Measurable impact: hours saved, output quality

📁 Scalable — from teams of 10 to 1,000+

98% Team Confidence Rating · Platform Agnostic · KPI-Driven

DYSTIL LAUNCHPAD (STUDENTS)

Career Accelerator for Graduates & Switchers

Practical AI skills, project experience and career guidance for students, graduates and professionals making a career change into AI-augmented roles.

🚀 Foundation & Advanced bootcamp pathways

📁 Internship-style project experience

👤 Mentor support & career guidance

📄 Certificate of corporate experience

Graduates · Students · Career Switchers · Working Professionals

Two Bootcamp Options. One Career Goal.

FOUNDATION

2-Day Career Accelerator

A focused bootcamp giving fast exposure to AI tools, digital skills, career direction and project thinking, **all related to your domain.**

- Industry shift and AI skills needed deep dive
- Identified use case discussions
- Half a day “Hands On” project – AI and digital skills uplift
- Entrepreneurship framework and leadership
- Career profiling / job outreach guidance
- Industry networking and interaction
- Project experience certificate

ADVANCED

RECOMMENDED

2-Week Internship Project Bootcamp

An internship-style deep dive with sprints, mentor support, tech workspace, project delivery and corporate experience.

- Includes all of foundation
- Real AI build project (one sprint) related to domain interest with mentor guidance
- Tech workspace & tools access
- Portfolio-ready project delivery
- Work experience certificate

DYSTIL
